

MEDICAL PERMISSION SLIP

During Troop 778's many indoor and outdoor activities, it is sometimes necessary to provide medical attention for minor aches and pains. For that purpose we have listed several medications below for you to choose from should the need arise to give them to your son. We recommend that you use the weight based chart on the back of this form as a guide on which dosage to select. It is also necessary that we have permission to dispense the doctor prescribed medication that you have listed below.

Scout's Name _____ Weight (lbs.) _____

He is in good physical condition at the present time. He may receive emergency medical treatment at my expense. I also give my permission for the Adult Leaders of his Troop to dispense the listed medications to my son. All of these medications and listed strengths are over the counter medications. Please check all that apply.
